1	Anchor Shackel	Anchor System
1	Front Pully Snap Clip	Anchor System
1	Hardware Pkg. (nuts/bolts,etc.)	Anchor System
50	50' 3/8 anchor rope	Anchor System

* Lots of accessories and options available at www.streamtechboats.com.

What our customers have to say about us

*Hay Link, I have had the boat on the Klickitat, Deschutes twice, and on a 5 day trip on the South fork of the Flathead River. Mule packed the whole thing in. The Boat performs phenomenally. The Flathead was a little short on days 1 and 2 but deepened up for us. Cutthroat city. Rowed through Boxcar and all those big name rapids with 5 guys, 3 labs and a German shorthair. Boat is stable as can be, even with the anchor system. You guys did a phenomenal job designing this boat. **Andy Arnold, Ellensburg Washington***

*I did end up fishing a fork of the Mckenzie with my brother-in-law just after you and I met in Ontario. He's usually dismissive of "rubber boats," but he had no trouble rowing mine. In fact, I fished a ton that day because he didn't want to give up the oars. Liked it a bunch. Especially admired the anchor system. **Halvor Tweto, Missoula MT***

*We used to own a traditional raft, as well as both a Hyde and Clackacraft hard boat. To say we have been pleased with your boat is putting it mildly. It always works well whether it be higher water at the start of the fishing year or low water in October. It is the best boat for our needs and is better than either the traditional raft or hard boat for our fishing. **Bryan W. Gelnwood Springs, Colo.***

*Just a quick note to tell you how much I like the boat. It handled well and my friends enjoyed fishing from it. It is also very forgiving. There were a couple places where my wood boat would have lost some chunks. I'm going to do a different float and river each week. Thanks again, Ciao **Dan U. Chile***

*Best boat made. The design is great and works great in technical sections. I don't know how you did it but it actually attracts fish. **Tom F. Colorado Springs, Colo.***
