50	50' 3/8 anchor rope	Solid braid nylon rope from Salamander
1	Surprise Streamtech swag	Could be a Voormi shirt, vest, pull over, hat or some other such treat

### What our customers have to say about us

*Link, I wanted to drop you a quick note on my Boat. 1 year in and I'm even happier than I thought I would be....and I was expecting to be thrilled. It is in many ways the perfect platform to row, to maneuver, to guide, to tour, to transport, and especially to catch fish from. It combines the best attributes of both a drift boat and a white water raft and it is a cinch to row. People love to see it and I get comments all the time. You've built a unique and incredible craft and I am proud to row it. Thank you for building and backing up a great product. **Jim Dawson, Cameron MT***

*Oh man, Link, this thing is AMAZING! Took it out yesterday for the initial ride from Moose to Wilson on the Snake. I rowed first, as I obviously was excited to see how she performed. And I was certainly the opposite of disappointed! She slides across the water like a hard drift boat, but punches eddy lines with confidence and unmatched stability. We were all amazed at how awesome fishing from the BACK seat is...I mean, what boat have you ever been in that you actually don't mind fishing out of the back?!! We love how high up you are back there, even while seated! Also love the height of the rower's seat as well...definitely easier to see the fishies from up there (of which there were many!) **Travis Goodman, Jackson WY***

*Link, Can't put into words how much we are enjoying the boat. We did a multi day on the blackfoot and had to run some technical water. The boats stability and response on the sticks was quick when needed. Not to mention a few stares from the envious as we passed by. Fish, fun and sun. What more does one need? wait, I know. More fish, fun and sun. **Dennis Creel, Bitterroot Valley, Montana***

*I want to again mention that I get so many compliments on my streamtech and people definately come over and check it out! You have done a great job with this and I am so happy to have one! **Brad Owens, Washington State***

*I cannot begin to tell you how pleased I am with this raft, we rappelled the boat into a place that has no roads, and bone skinny water and had a epic day sneaking up on big steadies in gin clear water **David Perkins, Ellensburg WA***

*Link—My friends who know I build boats asked why I bought one instead of building it. First I told them that I bought the raw material from Maravia and custom made the tube—they actually believed me on that whopper. I then told told them that I used an investment casting process to make the frame. And on and on. Then I tell them that none of my best lies could match the real world experience of Link Jackson and that I bought the best drift boat on the planet, right off the shelf, and proud of it. **Richard Baumann, Springfield, MO***
